Attention Please !

In past years our annual wholesale pricelist has been issued in the fall after heavy advance sales had been made during the summer months and many fine items were sold out. Now, in order to give all our customers an equal opportunity to obtain our material, particularly new, scarce, or difficult to propagate items, we issue this list at this time.

For special quantity rates on advance orders see under QUANTITIES — inside of back cover.

NEW ITEMS

In addition to our regular lines we are continually developing or introducing additional **novelties and specialties**. For the past 20 years we have doubtless imported the greatest assortment of new and rare woody plants brought into this country during that period, and at the same time have carried on a program of breeding various woody ornamentals, including Lilacs, Flowering Quinces and Flowering Fruit Trees, etc.

We are continuing both of these programs and new items will be offered as rapidly as stock becomes available. In order to call your attention to some of these that are now available we have **"boxed in"** many plants of special interest.

Several items originated by us have been introduced on an exclusive basis by certain first-class catalog houses who wish "leaders" of high quality. We have several Lilacs and Flowering Quinces ready for introduction which can be patented if desired and we shall be glad to explain this arrangement on request.

PINTO TAG

We take pride in being a "Pinto Tag" nursery, enabling us to ship into nearly all California Counties with no point of destination inspection required.

DESCRIPTIONS

Short descriptions have been included in this list for the benefit of customers who are not acquainted with our stock. Where further information may be desired it will be given promptly on request.

FOR TERMS, CONDITIONS, SHIPPING NOTICE, ETC., SEE INSIDE OF BACK COVER.

EXPLANATION OF HARDINESS RATINGS

As this list goes all over the U. S. A. and also abroad, we believe it a good idea to indicate hardiness. This has been done by giving after the name of each item a number in () indicating the one up to which it is considered hardy.

Our authority through Zone 7 is Rehder's Handbook. For Zones 8 to 10 we have been guided by Pacific Coast experience and have subdivided Zone 9 so that

(9) indicates probably safe to 20° (Sacramento and San Joaquin Valleys, etc.).

(9½) indicates probably safe to 25° or 26° (San Francisco Bay Region, etc.).

(10) indicates will stand only very light frost.

To find the zone you are in refer to the map in center pages of this book, which we use by the courtesy of Arnold Arboretum and McGraw Hill Book Co.

We hope this will be helpful to nurserymen all over the country. Please understand that ratings show our honest opinion, but we disclaim all responsibility for their correctness.

ABBREVIATIONS

Letters A, B, C, D, E, etc., after variety names indicate the sizes available.

POT GROWN AND GALLON CAN STOCK

We find that many customers, especially those at a distance, prefer to have us remove soil and ship "bare roots" packed in moss. If you order any of this class of material please be sure to say whether you want it packed with or without soil on the roots.

We have enlarged our facilities for the production of quality gallon can stock and from now on we will be able to offer more high class ornamentals in gallon cans. We will continue growing 4 in. pot stock for field planting, and for shipping orders where weight is a factor. When available, we will also offer 2½ and 3 in. pot stock as lining out material, but have none to offer this season.

LOCATION

Office and Sales Yard located on Oakland-San Jose Highway at Coyote Creek Bridge, about one mile north of San Jose City Limits. Other growing grounds are within a mile or two of the office. Visiting nurserymen are welcome at all times.

Conifers

Unless otherwise stated, all plants in this section will be balled at prices quoted.

ABIES pinsapo (6)

SPANISH FIR

A slow growing symmetrical conifer with stiff sharp foliage.

	10 rate @	100 rate @
gal.80	.75

CEDRUS atlantica glauca (6)

BLUE ATLAS CEDAR

Young plants have a stiff open appearance but quickly develop into beautiful full specimens.

2½ to 3 ft.	3.25	3.00
------------------	------	------

deodara (7)

DEODAR CEDAR

Makes a large graceful specimen tree. Foliage gray-green.

4 to 5 ft.	3.75	3.50
3½ to 4 ft.	3.50	3.25
3 to 3½ ft.	3.25	3.00
2½ to 3 ft.	3.00	2.75

deodara repandens (7)

SPREADING DEODAR CEDAR

A very attractive weeping form of picturesque habit. Should be staked for first few years.

2½ to 3 ft.	3.25	3.00
------------------	------	------

CHAMAECYPARIS lawsoniana ellwoodi (5)

ELLWOOD CYPRESS

A moderate grower of columnar habit. Foliage silvery blue, fine and lacy. Grafted plants have proven to be more vigorous and disease resistant.

18 to 24 in.	2.25	2.00
15 to 18 in.	1.75	1.60
gal.80	.75

lawsoniana grandis (5)

Similar to Birdnest Cypress but foliage glaucous.

12 to 15 in.	1.75	1.60
gal.80	.75

lawsoniana knowfeldensis (5)

KNOWFELD CYPRESS

Habit graceful, upright and arching. Sage green foliage.

12 to 15 in.	1.75	1.60
gal.80	.75

CONIFERS

CHAMAECYPARIS (continued)

lawsoniana minima (5)

DWARF LAWSON CYPRESS

Extremely dwarf and compact with dark green plumose foliage.

	10 rate @	100 rate @
4 in. pot.....	1.20	1.10

lawsoniana minima aurea (5)

GOLDEN DWARF LAWSON CYPRESS

Differs only from above in its golden foliage.

4 in. pot.....	1.20	1.10
----------------	------	------

lawsoniana minima glauca (5)

BLUE DWARF LAWSON CYPRESS

Differs only in its glaucous foliage.

12 to 15 in.....	2.25	2.00
4 in. pot.....	1.20	1.10

lawsoniana nidiformis (5)

BIRDNEST CYPRESS

Branches semi-ascending and drooping toward tips. Natural growth wider than tall.

12 to 15 in.....	1.75	1.60
gal.80	.75

lawsoniana stewarti (5)

WINTERGOLDEN LAWSON CYPRESS

Growth slow, compact and erect. Remains as brilliantly golden in winter as in summer.

2½ to 3 ft.....	3.00	2.75
gal.80	.75

obtusa gracilis (3)

SLENDER HINOKI CYPRESS

Upright, gracefully branching habit. Slow growing and requires part shade.

gal.	1.35	1.25
4 in. pot.....	1.20	1.10

obtusa gracilis aurea (3)

YELLOWTIP HINOKI CYPRESS

Differs only from above in its golden foliage.

4 in. pot.....	1.20	1.10
----------------	------	------

pisifera aurea compacta nana (3)

YELLOWDWARF SAWARA CYPRESS

Extremely dwarf and compact. Golden acute foliage.

10 to 12 in.....	2.25	2.00
4 in. pot.....	1.20	1.10

CRYPTOMERIA japonica nana (5)

DWARF CRYPTOMERIA

Slow growing globular habit.

gal.80	.75
-----------	-----	-----

CONIFERS

JUNIPERUS chinensis columnaris (4)			10 rate @	100 rate @
BLUE COLUMN JUNIPER				
Erect formal pyramidal habit. Foliage slightly silvery.				
4	to 5	ft.....	4.00	3.75
3½	to 4	ft.....	3.50	3.25
2	to 2½	ft.....	2.50	2.25

chinensis pfitzeriana (4)

PFITZER JUNIPER

Most popular spreading Juniper. Branches grow horizontal, slightly drooping.

gal.55	.50
-----------	------------	------------

chinensis torulosa (4)

TWISTED CHINESE JUNIPER

Growth gracefully fanshaped, upright and arching. Dark green foliage.

gal.80	.75
4 in. pot.....	.55	.50

communis compressa (2)

"DWARF IRISH JUNIPER"

Dwarf, slender and erect with deep silvery foliage.

4 in. pot.....	.55	.50
----------------	------------	------------

coxi (7)

COX JUNIPER

A handsome erect pyramidal Juniper with weeping branches.

4 in. pot.....	.55	.50
----------------	------------	------------

japonica "San Jose" (4)

SAN JOSE SPREADING JUNIPER

Found here as a sport of one of the creeping Junipers. Color is about sage green, much more pleasing than Chinese Creeping Juniper. Shows no variegation but has a mixture of adult and juvenile foliage. After ten years test it has become very popular and is now our best seller in prostrate Junipers.

1½	to 2	ft.....	2.25	2.00
15	to 18	in.....	2.00	1.75
gal.80	.75
4 in. pot.....			.55	.50

occidentalis glauca (7)

SILVER SIERRA JUNIPER

A fine silvery blue form of the Sierra Juniper. Habit slim and conical.

3	to 3½	ft.....	3.50	3.25
2½	to 3	ft.....	3.25	3.00

CONIFERS

JUNIPERUS (continued)

sabina tamariscifolia (4)

TAMARIX JUNIPER

Growth low, spreading and densely compact. Attractive gray-green feathery foliage.

	10 rate @	100 rate @
4 in. pot.....	.55	.50

squamata meyeri (4)

MEYER JUNIPER

Irregular spreading habit. Foliage silvery blue.

1½ to 2 ft.....	2.25	2.00
-----------------	------	------

virginiana lebretoni (3)

LEBRETON EASTERN REDCEDAR

Growth erect and compact. One of the most intensely glaucous conifers known.

2½ to 3 ft.....	3.25	3.00
2 to 2½ ft.....	2.75	2.50

LIBOCEDRUS chilensis (6?)

CHILEAN INCENSE-CEDAR

A symmetrical pyramidal conifer. Foliage soft green.

3½ to 4 ft.....	3.50	
-----------------	------	--

PICEA pungens (green) (2)

COLORADO SPRUCE

A formal tree with close stiff branches. Color varies from light to dark green.

gal.	1.35	1.25
-----------	------	------

pungens moerheimi (2)

MOERHEIM BLUE SPRUCE

A deep blue form of Colorado Spruce.

4 in. pot grafts.....	1.20	1.10
-----------------------	------	------

PINUS mugo mughus (2)

DWARF MUGHO PINE

Probably the dwarfest of all Pines. Grows about as wide as high.

gal.80	.75
-----------	-----	-----

patula (8?)

JELECOTE PINE

Long drooping needles. Spreading, rounded head.

3½ to 4 ft.....	3.25	3.00
2½ to 3 ft.....	2.75	2.50
gal.80	.75

radiata (7)

MONTEREY PINE

Growth rapid, upright, handsome and picturesque.

3 to 3½ ft.....	2.50	2.25
-----------------	------	------

CONIFERS

SEQUOIA sempervirens (7)

REDWOOD

Tall, graceful native of California.

	10 rate @	100 rate @
gal.65	.60

TAXUS baccata fastigiata (6)

IRISH YEW

Columnar habit, dark green foliage. Slow growing.

3½ to 4 ft.	4.50	4.25
------------------	------	------

2½ to 3 ft.	3.75	3.50
------------------	------	------

baccata Silver Green (6)

SILVER GREEN SPREADING YEW

A neat compact spreading form with rich deep green foliage with a slight silvery cast.

2½ to 3 ft.	3.25	3.00
------------------	------	------

2 to 2½ ft.	3.00	2.75
------------------	------	------

1½ to 2 ft.	2.50	2.25
------------------	------	------

THUYA occidentalis pyramidalis (2)

PYRAMIDAL EASTERN ARBORVITAE

Narrow pyramidal habit. Deep rich green foliage.

4 to 5 ft.	3.75	3.50
-----------------	------	------

3½ to 4 ft.	3.25	3.00
------------------	------	------

3 to 3½ ft.	3.00	2.75

Broad Leaved Evergreens

Unless otherwise stated, all plants in this section will be balled at prices quoted.

ABELIA floribunda (8)

MEXICAN ABELIA; RED ABELIA

Small shrub with glossy dark green foliage producing tubular rosy red flowers 1½ to 2 inches long. Requires partial shade.

	10 rate @	100 rate @
gal.55	.50
4 in. pot.....	.50	.45

hyb. Edward Goucher (6)

Similar to *A. grandiflora* but bearing lilac-pink instead of white flowers in great profusion throughout the summer.

3 to 4 ft.....	2.75	2.50
1½ to 2 ft.....	2.25	2.00
gal.55	.50

ARBUTUS unedo (7)

STRAWBERRY MADRONE

Large, handsome shrub with dark green leaves. Bears red strawberry-like fruits in winter.

3 to 4 ft.....	2.50	2.25
2 to 2½ ft.....	2.00	1.75
1½ to 2 ft.....	1.75	1.60
gal.55	.50
4 in. pot.....	.50	.45

ARISTOTELIA racemosa (8?)

NEW ZEALAND WINEBERRY

An evergreen tree to 15 or 20 ft. Leaves about 5 inches long and deeply serrate, light green on surface and ruddy beneath. Small rose colored flowers are followed by dark red or nearly black berries in clusters.

gal.55	.50
-----------	-----	-----

AUCUBA japonica Croton (7)

CROTONLEAF AUCUBA

Growth and habit similar to other variegated Aucubas but the brilliance and intensity of its golden variegation far surpasses them. This is a male form and can be used as a pollinizer.

1½ to 2 ft.....	2.25	2.00
12 to 15 in.....	1.75	1.60
gal.65	.60

BROAD LEAVED EVERGREENS

AUCUBA (continued)

japonica fructo-albo (7)

10
rate
@

100
rate
@

Foliage profusely and brightly silver-variegated. Fruit pale pinkish-buff. Requires shade.

gal.65	.60
-----------	-----	-----

japonica maculata (7)

GOLD DUST AUCUBA

Large green leaves covered with yellow dots. Berries red.

gal.55	.50
-----------	-----	-----

japonica nana (7)

DWARF AUCUBA

A dwarf form bearing unusually large berries.

1 1/2 to 2 ft.	2.25	2.00
gal.65	.60

japonica salicifolia (7)

WILLOWLEAF AUCUBA

Leaves clear deep green, long and narrow. Bears heavy clusters of bright red berries.

2 to 2 1/2 ft.	2.50	2.25
1 to 1 1/2 ft.	1.75	1.60
gal.65	.60

AUCUBA japonica male (7)

All of our berry-bearing Aucubas are grown from cuttings taken from female plants but must be pollinized by male plants in order to produce berries.

gal.55	.50
4 in. pot.50	.45

AZARA gilliesi (9)

GOLDEN AZARA

Large shrub with holly-like foliage. Bears golden flowers in showy drooping racemes in winter.

4 in. pot.80	.75
-----------------	-----	-----

CALLISTEMON citrinus splendens (9)

BRILLIANT BOTTLEBRUSH

The most vividly colored red "Bottlebrush" we have ever seen. Heavy bloomer and of compact habit.

gal.60	.55
4 in. pot.55	.50

gal.65	.60
4 in. pot.....	.55	.50

pectinatus (9)

"SILVER AND GOLD BUSH"

An unusual rounded shrub of compact habit with deeply cut silvery leaves. Bright yellow daisy-like flowers are borne profusely in late winter and spring.

4 in. pot.....	.55	.50
----------------	-----	-----

FRAXINUS udhei (9)

SHAMEL ASH

Fast growing, tall, slender tree with long, glossy, pointed leaves.

gal.55	.50
-----------	-----	-----

FREMONTIA californica (9)

CALIFORNIA FREMONTIA

A small native tree or large shrub requiring a dry location. Very showy large yellow flowers are borne profusely in late spring and summer.

gal.65	.60
4 in. pot.....	.55	.50

GARDENIA jasminoides "Mystery" (8-9?)

A vigorous plant with large luxuriant foliage. Flowers are snow-white with rich fragrance. Requires acid soil.

gal.65	.60
-----------	-----	-----

GENISTA aethnensis (8)

ÆTNA BROOM

An erect shrub of good size. Golden yellow, fragrant flowers.

4 in. pot.....	.55	.50
----------------	-----	-----

monosperma pendula (9)

WEeping BRIDALVEIL BROOM

A graceful Broom of weeping habit bearing a profusion of drooping white flowers.

gal.65	.60
4 in. pot.....	.55	.50

HYMENANTHERA crassifolia (7)

An interesting low growing, spreading shrub with small leaves and inconspicuous flowers bearing a fine crop of small white berries.

4 in. pot.....	.50	.45
----------------	-----	-----

ILEX, HOLLY

10 rate @	100 rate @
-----------------	------------------

All are grafted and female. Due to climatic conditions we have given up production of field grown plants but shall continue offering young grafted plants. Uniform price for all types below.

4 in. pot.....	.70	.65
----------------	-----	-----

altacolarensis wilsoni (7)

A broad, spiny leaved Holly bearing large red berries.

aquifolium Chambers (5)

ENGLISH HOLLY

The handsomest form of English Holly we know. Growth symmetrical and compact; foliage of medium size and prickly margined. Bears a most profuse crop of well placed berries.

aquifolium Golden Beauty (5)

The golden variegation is very pronounced.

aquifolium Golden Variegated (5)

Leaves are very prickly and wavy and heavily blotched golden yellow.

aquifolium pendula (5)

Makes a large shrub, wider than tall. Habit is partially weeping.

aquifolium Silver Variegated (5)

aquifolium Van Tol (5)

Has heavy dark green leaves, only slightly prickly. Bears large bright red berries in profusion. Self-fertile.

cornuta (7)

CHINESE HOLLY

Large shrub with foliage resembling Eastern Holly. Scarlet berries are spread along the branches. Hardy.

cornuta burfordi (7)

BURFORD HOLLY

Berries in extreme profusion, large, bright red. Grows and bears well in hot areas.

ILEX aquifolium male (5)

Most female hollies must be pollinized by male plants to produce berries.

4 in. pot.....	.55	.50
----------------	-----	-----

JASMINUM parkeri (7)

PARKER JASMINE

A dainty miniature shrub of rounded, compact habit. Flowers bright yellow in profusion. Fine for rock gardens.

BROAD LEAVED EVERGREENS

	10 rate @	100 rate @
LEPTOSPERMUM hybrids (9½)		
Uniform prices for all varieties shown.		
gal.60	.55
4 in. pot.....	.55	.50

Red Damask

Very double deep red; early.

Ruby Glow

Rich deep red, not quite as dark as Red Damask.
Very double and very attractive.

Scarlet Carnival

Double, bright rosy red.

LEPTOSPERMUM scoparium Double Rose (9½)

DWARF ROSE FLOWERED TEATREE

Bears small double rose pink flowers like miniature roses.

4 in. pot.....	.50	.45
----------------	-----	-----

LEUCADENDRON argenteum (10)

SILVER TREE

The famous Silver Tree of the Cape of Good Hope. Bark, branches and especially foliage are intensely silvery. Suitable only to warm climates.

4 in. pot.....	.70	.65
----------------	-----	-----

LOROPETALUM chinense (7)

FRINGEFLOWER

A slow growing, shade loving shrub that starts blooming freely while still small. The graceful white flowers have strap-shaped petals like Witch-Hazel and appear in late winter and early spring.

gal.70	.65
4 in. pot.....	.60	.55

BROAD LEAVED EVERGREENS

MAGNOLIA grandiflora (7)

SOUTHERN MAGNOLIA

A handsome tree with large glossy green foliage. The huge creamy-white fragrant flowers are up to 8 inches in diameter.

Lilacs

SYRINGA vulgaris (3)

We fully believe that our active propagating list embraces the most up-to-date collection of lilacs offered to the trade in this country.

It seems absurd to see so many ancient varieties still being listed. They were all good when originated 75 or 100 years ago but there has been plenty of progress in the meantime, particularly in the size of the individual flowers or "florets" as they are sometimes called and also in a wider range of color tones. If your collection is not really up-to-date why not do something about it?

(Lilacs must be ordered in multiples of 5 of each variety as they are bundled that way when dug).

NOVELTIES

Several lilacs originated by us are now being introduced on an exclusive basis by certain first-class retail catalog houses who wish "leaders" of high quality. Most of these are or will be patented. We have a few more of these lilacs ready for introduction and shall be glad to explain the arrangement on request.

D	1½	to 2	ft.....	1.40	1.30
E	1	to 1½	ft.....	1.10	1.00

Letters after varieties indicate sizes available.

CLARKE'S GIANT, CDE; Plant Pat. No. 754.

The flowers are **single**, soft gentian blue of enormous size, 1¼ to 1½ inches across, borne in huge clusters of unusual pyramidal form, up to 12 in. or better and 7 to 8 in. wide at base. Flower clusters are carried well above the large foliage. Fragrance leaves nothing to be desired. East of Rockies this is obtainable from Wayside Gardens, Mentor, Ohio.

ESTHER STALEY, CDE; Plant Pat. No. 768.

Fills all the requirements of a good single pink lilac. Opening buds are red; flowers, large **single**, and pure pink without the usual lavender tinge. Clusters are of good size and produced freely in midseason; growth very vigorous. East of the Rockies this is obtainable thru Wayside Gardens, Mentor, Ohio.

PINK SPRAY, CDE; Plant Pat. No. 831.

A delightful **single** pink variety which is earlier than Esther Staley and a somewhat softer pink, contrasting well with the dark rosy mauve buds. The flowers have a daintiness and charm which is hard to describe and is enhanced by the stamens showing prettily. Cut flowers last unusually well.

PURPLE GLORY, CDE; Plant Pat. No. 946.

Long pyramidal clusters. Flowers **single**, 1 to 1½ inches wide, dark ruddy purple. Mid-late.

PURPLE HEART, CDE; Plant Pat. No. 832.

This very early variety has purplish black buds opening to deep purple, **single**, very large flowers attaining between 1¼ to 1½ inches in width, borne in large clusters. Preferred by many to Marceau which is high praise indeed. East of the Rockies this is obtainable thru C. R. Burr & Co., Manchester, Conn.

SPLENDOR, CDE; Plant Pat. No. 837.

The dark ruddy purple buds open to purplish blue, moderately large **double** flowers in clusters of good size. Blooming time is from mid-season to late as it flowers over an unusually long period. The flowers are definitely not crowded together in the cluster, avoiding a trait that completely spoils so many otherwise good doubles. The bronzy hue of the new growth is another uncommon character. East of the Rockies this is obtainable thru C. R. Burr & Co., Manchester, Conn.

SUNSET, CDE; Plant Pat. No. 937.

A striking late **double** that is unusual in several respects. Buds are deep mauve carmine; the fully double flowers with numerous long "petals" are large, over an inch wide and ruddy purple. Comes nearer to a real "double red" than anything else we have ever seen. In our opinion this surpasses Mrs. Edward Harding. East of the Rockies this is obtainable thru C. R. Burr & Co., Manchester, Conn.

LATEST EUROPEAN INTRODUCTION

10 rate 100 rate

MME. CHAS. SOUCHET

Lemoine's Latest Introduction!

We quote his description verbatim.

"This beautiful novelty will create a great sensation among Lilac lovers. Very large and regular **single** flowers of the purest sky blue with enormous panicles. This variety is very floriferous and even blooms on young plants." European price this past season \$8.00 each, wholesale!

Oriental Magnolias

We grow what is probably the most complete collection of deciduous Magnolias in this country. During the war years seed for suitable grafting stocks was practically unobtainable. We are rapidly catching up and now take great pride and pleasure in offering this fine list.

All plants are grafted and will be balled at prices quoted.

E 1½ to 2 ft.	3.50	3.00

Letters after varieties indicate sizes available.

MAGNOLIA campbelli, XABCD; (8?)

CAMPBELL MAGNOLIA

This grand Magnolia from the foothills of the Himalayas has been celebrated in horticultural literature for many decades, but owing to difficulty of propagation there have been only a few trees in the U. S. A. and none of these had been known to flower until the specimen in Golden Gate Park, San Francisco, first bloomed in the spring of 1940. The flowers are rosy pink and are said to range anywhere from 8 to 14 inches wide. It prefers cool, moist conditions and here anyway does not like the full sun when young. We are now producing this wonderful Magnolia in fairly good numbers and all our stock traces back to the tree mentioned above. Grafting should hasten blooming and in fact flowers have already been reported on some of our early propagation.

dawsoniana, ABC, (7)

DAWSON MAGNOLIA

A magnificent, vigorous and distinct species with large dark green foliage with wavy margins. Flowers in great profusion up to 10 to 15 inches wide, rose violet outside and white within. Very rare and stock limited.

MAGNOLIAS (continued)

***liliflora nigra*, ABC (5)**

This is a very rare and striking variety. Buds are pansy black. Open flowers are almost that dark outside and dark velvety purple inside. Flowers are large and produced freely even on young plants.

***mollicomata*, BC (7-8?)**

Similar to *M. campbelli*. Flower buds larger and oblong in shape. More important, it is precocious in flowering habit. Available in very limited quantity only.

***proctoriana*, BC (6?)**

PROCTOR MAGNOLIA

A hybrid of *salicifolia* and *stellata*. Buds and flowers white. Makes a tree of rather dense growth.

***sargentiana robusta*, ABC (7)**

SARGENT MAGNOLIA

An outstanding variety. Flowers are a beautiful blend of pink and white, large and borne freely even on small plants.

***sinensis*, XABC (7)**

CHINESE MAGNOLIA

A lovely variety bearing pendulous saucer shaped pure white flowers with showy brilliant crimson stamens.

***veitchi*, XABC (7)**

VEITCH MAGNOLIA

A magnificent hybrid of *M. denudata* x *campbelli*. Very vigorous and quickly making a large tree bearing a profusion of rosy pink flowers of great size.

***wilsoni*, XAB (5)**

WILSON MAGNOLIA

Could be described as a glorified *M. parviflora* having very much larger snow white drooping flowers with crimson column arising in center. Fragrance is intense and delightful. Flowers are remarkable in having as many as 8 or more petals together with 3 "tepals" (petaloid sepals).

ORIENTAL MAGNOLIAS

MAGNOLIA stellata (5)

STAR MAGNOLIA

Flowers white to soft pink. Slow growing. Free flowering even on very small plants.

	10 rate @	100 rate @
2 to 2½ ft.....	4.00	3.50
1½ to 2 ft.....	3.50	3.00

stellata rosea (5)

PINK STAR MAGNOLIA

A pink form of *M. stellata* which seems to grow much more vigorously. Profuse flowering even when young.

	10 rate @	100 rate @
2 to 2½ ft.....	4.00	3.50
1½ to 2 ft.....	3.50	3.00

stellata rubra (5)

RED STAR MAGNOLIA

A striking new and rare form. Back of petals deep purplish red; inside is a rich pink even when fully open. Stock is still very limited.

MAGNOLIA denudata, XBC

YULAN MAGNOLIA

Large, pure white cup-shaped flowers. Deliciously fragrant.

liliflora, BC

LILY MAGNOLIA

Growth shrubby and erect. Flowers deep purple outside.

soulangeana Alexandrina, XABCD

ALEXANDER MAGNOLIA

Large cup-shaped flowers, deep rose right to the tips, white inside; early.

soulangeana amabilis (M. alba superba), XAB

Flowers are somewhat purplish at first becoming nearly but not entirely white when fully open.

MAGNOLIAS (continued)

soulangeana Burgundy, ABC

An unidentified but very pleasing and distinct form. The flowers are much larger than type, well rounded, purple about half way up on the outside of the petals.

soulangeana Brozzoni, BCD

A very fine variety bearing huge flowers (up to 10 in.) when fully open, white slightly flushed at base.

soulangeana lennei, XABC

LENNE MAGNOLIA

Bears enormous balloon-shaped, very deep ruddy purple flowers. One of the latest to bloom.

soulangeana rustica, XA

PURPLE MAGNOLIA

Large, rounded flowers deep ruddy purple to tips. A very vigorous grower.

soulangeana San Jose, XBC

Comes into bloom very early and is certainly the largest of the light colored soulangeana forms. Flowers white lightly flushed pink. General effect is pink.

soulangeana verbanica, XABC

Very large flowers fully colored light purplish-pink. Unopened buds long, slender and pointed.

Flowering Quinces

Chaenomeles (Cydonia)

C. cathayensis and its hybrids (6)

All others (4)

Our 17 years work in breeding better forms of Flowering Quince has been recognized by both California Horticultural Society and Royal Horticultural Society (of England) by their Awards of Merit. With two or three exceptions every variety we now offer was originated by us.

N. B.—Cathayensis Hybrids are rated (6) for hardiness so not recommended for Zone 5 and colder. All others are safe wherever any Flowering Quince thrive.

D 1½ to 2 ft.....	1.25	1.10

Letters after varieties indicate sizes available.

AFTERGLOW, BCD (Plant Pat. No. 847)

Lagenaria type. Flowers are large, **double** and at first snow white gradually becoming soft rose as the blossoms age. Leaves are dark green, long and slender. Growth is vigorous. Available in South-eastern States and Texas thru H. G. Hastings Co., Atlanta, Georgia.

CHARMING, BCD

Superba type. Long, unbranched, thornless shoots bear a profusion of soft shell-pink flowers deepening toward the ends of the petals. An orderly shrub attaining a height of about 6 ft. East of the Rockies it is obtainable thru Wayside Gardens, Mentor, O.

MINERVA, CD

A miniature Cathayensis Hybrid of low but erect growth. Flowers are enormous, deep but vivid rose red. Observed and checked for the sixth spring and now offered for the first time this season.

MT. SHASTA, BCD

Lagenaria hybrid. Coloring resembles Mt. Everest, buds are lightly tinted lavender rose but open white except for faint pinkish lavender at tips. Flowers are unusually large with overlapping petals and borne in utmost profusion. Growth moderate. Offered for the first time this season.

NASTURTIIUM, BCD

A Cathayensis seedling of vigorous, erect growth, unquestionably outstanding for color and enormous well shaped flowers, the largest 2¼ in. broad. The color is distinctly unique, Chinese Coral aging to Nasturtium Red; mid-late. Leafs out late so foliage does not obscure flowers. Received Award of Merit California Horticultural Society 1950 and offered for the first time this season.

RED RUFFLES, BCD (Plant Pat. No. 941)

A Lagenaria type of medium strong, erect, growth almost thornless. The flower petals are so large they overlap producing an attractive ruffled effect — something entirely new in Flowering Quinces. The color is a dazzling brilliant red. We believe this to be the best red to date. Offered for the first time this season.

ROSY MORN, CD

A Superba type but may have some Cathayensis "blood." Medium height and bushy habit. Flowers are very large, over 2 in. broad and borne profusely. The color is decidedly out of the ordinary, a very soft carmine to Porcelain Rose. The showiest of the early varieties but also produces a very late crop giving it a remarkably long flowering season. Offered for the first time this season.

ROXANA FOSTER, BCD

A Superba type of slow and orderly growth, branching freely. The color is deep shell pink in center, deepening to carmine rose at tips. The flowers are borne in remarkable profusion in mid-season. Available in the Southeastern States and Texas thru The Foster Nurseries, Houston, Texas.

RUBY GLOW, CD

A strong, erect growing Superba type, nearly thornless. The flowers are dazzling rich red with showy golden stamens. Petals are beautifully frilled or ruffled. Mid-late.

FLOWERING QUINCES

TEXAS SCARLET, BCD

This variety belongs to the Superba group, is of low and bushy habit and practically thornless. The flowers are very large, over 2 in. broad and borne in great profusion over a very long period. Color is a beautiful watermelon red. Available in Southeastern States and Texas thru The Foster Nurseries, Houston, Texas.

Climbers

CAMPSIS grandiflora (7) (*Bignonia grandiflora*)

CHINESE TRUMPETCREEPER

10	100
rate	rate
@	@

Better known as *Bignonia chinensis* or *B. grandiflora*. It is easily one of the handsomest deciduous climbers where it is sufficiently hardy. It is not rampant so not likely to get much more than 10 feet tall. For several weeks in summer it covers itself with great terminal sprays of large funnel-shaped yellowish flowers suffused at tips with orange red.

2 yr. field grafts, bare root.....	1.20	1.10
1 yr. field grafts, bare root.....	.85	.80

Mme. Galen (5)

While the common Trumpet Vine (*Tecoma radicans*) is practically a weed, its marriage to *C. grandiflora* resulted in this gorgeous hybrid which combines the hardiness of the former with the beauty of the latter. It is a stronger grower than *C. grandiflora* but much less rampant than *T. radicans*. The flowers which also are borne in large clusters at end of shoots are almost as large as those of *C. grandiflora* and much redder. It blooms all summer and when in full bloom is a solid mass of flowers.

2 yr. field grafts, bare root.....	1.20	1.10
1 yr. field grafts, bare root.....	.85	.80

Roses

We are members of ALL AMERICA ROSE SELECTIONS which gives us first access to the annual ALL AMERICA WINNERS.

We grow three types extensively. **Bush and Climbing, Standard (Tree), and dormant or started eye plants for greenhouse forcing.**

STANDARD (Tree) ROSES

Our **four-budded** Trees with well developed heads on strong 36 inch stems have made a hit throughout the country. Available are the latest varieties including the 1952 All America Rose Selections. See complete new Wholesale Rose List for 1951-1952.

BUSH and CLIMBING ROSES

Rose stocks of all kinds, Bush, Climbing and Tree, were extremely short this past season and reports are that stocks in some large rose growing areas were again heavily damaged by frost early this year. Therefore, good roses may again be at a premium this coming season.

All America Winners for 1952 are

FRED HOWARD
HELEN TRAUBEL
VOGUE

Get your order in early for these; other fine patented varieties, and general collection roses. For complete list refer to new Wholesale Rose List for 1951-1952.

JUNE BUDDED (STARTED) GREENHOUSE ROSES

For delivery winter 1951 or spring 1952. We usually bud a greater quantity than contracts call for, but to be on the safe side orders should be in as soon as possible.

Bird's ^{IMPROVED} NEPONSET Flower Pots

We have on hand a moderate quantity of Bird's Improved Neponset Paper Pots in various sizes, both the red shipping variety and the Vita-pots for growing.

Prices f. o. b. San Jose

Size	Quantity per case	Price per 1000

As manufacturer's prices to us are "subject to change without notice," we are compelled to make the same proviso, but if prices are raised we will advise customers on receipt of order and get an O.K. before shipping.

Stock to Grow On

Because of our increased production of gallon can stock we will not have sufficient material to offer a special list of "growing on" items this season.

There are some items listed in the regular list available in 4 in. pots which may be used for growing on, and as our production increases we will again offer this material as available.

Please Note

All prices and other quotations not accepted to date are hereby cancelled.

Prices

All prices herein are **strictly net**, to the trade only and for goods at our nursery unless otherwise stated.

Quantities

In accordance with our long established rule, in order to stimulate advance sales, the hundred rates shown in this list will apply on all orders received up to November 1st, 1951, regardless of quantities ordered. After that date 25 or more plants of one kind and size will be supplied at 100 rate and 5 or more at 10 rate, but for less than 5 there will be a surcharge of 20 per cent. This plan avoids the bother of showing needless "each rates."

Pots. If pot grown stock is desired in the clay pots, a charge may be made for the pots at cost.

Terms. To buyers of known and established credit, **60 days net** from date of invoice. Otherwise cash with order or 25 per cent with order, balance C. O. D.

Grading. Plants wider than tall are graded by width.

Packing. At cost as usual, including paper pots if used. Plants will be packed to secure the lowest possible classification consistent with the nature of the goods shipped.

Warranty. Seller gives no warranty, express or implied, as to the variety or productivity of any nursery stock he sells. Liability in all instances is limited to the purchase price. No liability is assumed by the seller for delay or failure to deliver caused by wars, strikes, fires, floods, droughts, embargoes or any other contingencies beyond seller's control. If the purchaser does not accept the goods on these terms they are to be returned.

Shipping. Our responsibility ceases when goods are delivered to transportation company in good order. They travel at buyers risk. Please state distinctly whether you wish goods shipped by freight, express or truck line. A moderate charge will be made for delivery by our trucks to areas over 50 miles distant from nursery.

Complaints. Must be made in writing within 10 days after buyer receives the goods.

IMPORTANT NOTICE FOR EASTERN NURSERYMEN

Out here everything east of the Rockies is "Eastern"!

During January and February we ship several heated refrigerator cars to eastern points. Where size of order justifies, we can nearly always arrange for carload service to destination or some nearby point for pickup or reshipment. The total transportation charges for each car will be prorated among all customers who have goods in it.
